The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The independent claim should include the product produced. Without it, it is incomplete.

Applicants' process patentably distinguishes from the prior art intramolecular cycloaddition reaction of olefinic hydrazones in the use of chiral zirconium catalysts to produce high yields of asymmetric products.

Note that Kobayashi et al, cited by applicants, reference AM on Form PTO-1449, is a report of applicants work and has a date later than the effective date of this application.
